RE: Temporary water service interruptions on 10/10/2019

Dear Occupant,

In order to maintain/upgrade our water system we are repairing water mains in your area. **During this repair the water on your street may be temporarily shut off. We will attempt to limit service disruptions to Thursday October 10th from 9am to 5pm.**

Please note that once service has been restored **you will experience discolored water.** Once your water is turned back on let the **cold water** run in the lowest area of your home until it clears. If you happen to use any of the brown water for washing light and/or white clothing you may need to rewash your laundry with a product specifically made to remove iron which is available at most stores. (Bleach will not remove iron spots)

Thank you for your cooperation and understanding in this matter. For up to date information we encourage residents to subscribe to email updates and monthly newsletters by visiting the city website at www.berkleymich.org.

If you have any question please contact Department of Public Works @ 248-658-3490.
